# SECTION IV
# THE PLAYING SCREEN

*Canopy*— is the starting point for Problem Ships; also contains the blinker.

*Blinker*— starts blinking a few seconds before the Problem Ships fire at the Display Panel.

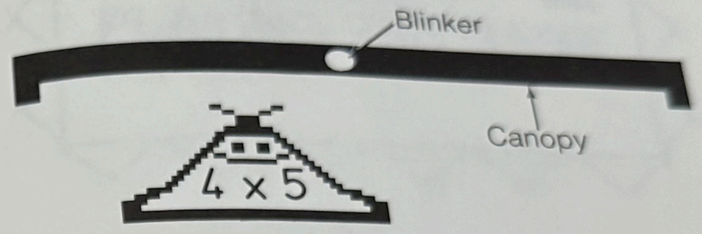
*Display Panel*— contains all of the information pertinent to the game in progress.

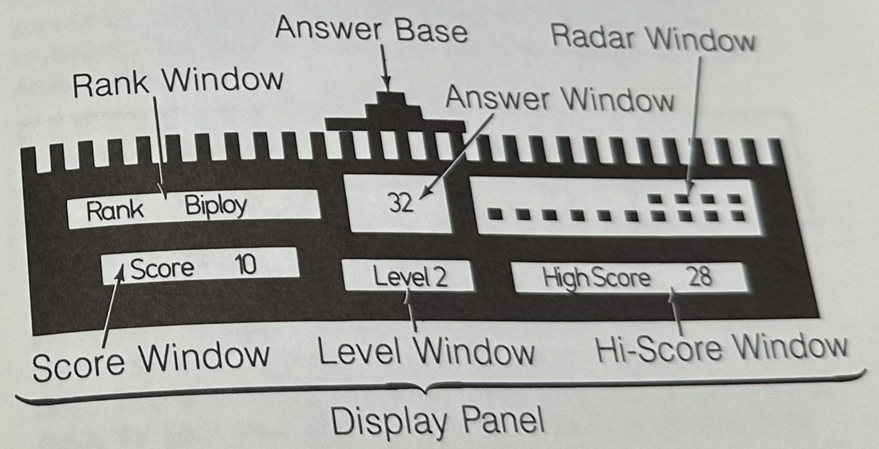
*Answer Base*— shoots rays at the Problem Ships when a correct answer is in the Answer Window.

*Answer Window*— displays numbers entered from the keyboard.

*Radar Window*— displays the number of Problem Ships that have not been destroyed.

*Hi-Score Window*— displays the highest game score for each level and operation as long as the computer is on.





# SECTION VII
# ABOUT THE PROGRAMS

*The programs and files that comprise this game are written in APPLESOFT BASIC and machine language. The game program uses random number generation for producing the problems and determining the point at which the Problem Ships will fire back. It also uses randomization to determine a hit from a Problem Ship.*
